

The 300 Committee Monitoring Report for T3C-Owned Properties

Date of Inspection:

Date of Previous Inspection:

Monitor:

Other Persons Present (names & affiliations):

Property

Property Name:

Acreage:

Location:

Assessor's Map No:

Landowner: The 300 Committee

Inspection

Inspect the Property for violations of T3C policy for parcels it owns.

Are there any encroachments by abutters?

Are boundaries easily found? If not, were they reflagged?

Are there any uses by the public which should be controlled?

Are these uses being conducted in an environmentally sound manner? Describe below:

Are there any changed conditions from the last visit?

(Note any significant undocumented effects from fire, erosion, flooding, blowdowns, changes in vegetation.)

Are there any changes in surrounding properties: development, erosion, tree cutting, etc?

Does the property have public access? If so, is this access properly maintained?

Photos

Were photographs taken?

(Pictures should try to duplicate photo locations and views found in the baseline documentation of the parcel or where a change in the property has occurred. Pictures should be labeled and transmitted to office electronically.)

General

Were any unusual plants, animals or other natural features observed?

Other comments:

Monitor's Signature: _____ Date: _____

Total time spent preparing, conducting survey of property and completing report: _____

File original in original documentation file and a copy in Field Notebook, both with captioned photos.
